## SUCCESS Points

**A few things you'll learn from this book:**

- How failure can be “fertilizer”
- Why you need to expand your mind to expand your wallet
- How creating value for others can propel you toward your millionaire goal
- Why you should control your money now so it won't control you later

Passion may be the most important element of entrepreneurial success.

So you want to be a millionaire! According to author Jim Stovall, virtually everyone makes enough money to become a millionaire—you just need a map to follow. In his latest book, *The Millionaire Map*, Stovall offers an outline everyone can use to achieve millionaire status.

While Stovall asserts that money is far from the most important thing in life, he also maintains that it affects every vital element of life. For Stovall, being a millionaire means you can live life on your own terms.

Using the analogy of a journey, *The Millionaire Map* reveals that, while not easy, becoming a millionaire is fairly simple. You need a starting point, a destination, a vehicle and, most important, a map—the plan for completing your millionaire journey.

Stovall's straightforward and practical guide begins with determining your net worth, which, he states, may be zero (or less). Stovall's own millionaire journey started from a negative net worth—at the moment he couldn't afford to buy a loaf of bread and resolved never to feel that way again. Now a decamillionaire, Stovall learned from this experience that intense passion for something you want or don't want will launch you toward millionaire status.

Leading you to find your destination, Stovall takes you back to childhood—when nothing was impossible, dreams and imaginations were big, and restrictions of time and money were nonexistent. He challenges you to discover what you would do in life if money were no object.

Continuing the journey, *The Millionaire Map* addresses calculating the costs related to your dream, finding the appropriate vehicle for your journey and avoiding the myths that can deter you from your goal. Additionally, the book offers practical ideas for preserving your wealth and sharing it with others.

While his target audience is those who aspire to create, preserve and share wealth, Stovall acknowledges that achieving millionaire status may not be everyone's goal. Regardless of your goal, his book will inspire you to live life on purpose, make the most of your time and invest yourself in what you value. *The Millionaire Map* speaks to those who desire what money will buy as well as to those whose goal it is to pursue what money cannot buy.
